

# How to Open Your Wilson & Friends PDF Flipbook

Your book is a PDF file. It works on most phones, tablets, and computers – no special software required on Apple devices.

## Which app should I use?

Find your device in the table below:

Device	App to use	Notes
iPhone / iPad	Apple Books	Best experience
Mac	Apple Books or Preview	
Android tablet / phone	Adobe Acrobat Reader (free)	Download from Play Store
Windows PC	Microsoft Edge or Adobe Reader	Edge opens PDFs natively
Kindle e-reader	Not compatible	Use a phone or tablet instead

---

## Opening on iPhone or iPad

- Tap the download link – the file saves to your Files app.
- Tap the file to open it.
- Tap Share (the  icon), then select Open in Books.
- The book is saved to your Apple Books library – tap the cover to open it.
- Swipe left and right to turn pages.

No internet connection needed once downloaded.

---

## Opening on Android (phone or tablet)

You need a free PDF reader. We recommend Adobe Acrobat Reader.

- Install Adobe Acrobat Reader from the Google Play Store (free).
- Tap the download link – the file saves to your Downloads folder.
- Open the Acrobat Reader app, tap Files, then Downloads.

- Tap the file to open it.
- Swipe left and right to turn pages.

Alternative: Most Android file manager apps (like Google Files) can open PDFs directly without Acrobat.

---

## Opening on Windows PC

- Click the download link — the file saves to your Downloads folder.
- Double-click the file. It will open in Microsoft Edge automatically.
- Use the arrow keys or scroll to turn pages.

Alternatively, open with Adobe Acrobat Reader (free from [adobe.com](https://adobe.com)) if you prefer.

---

## Opening on Mac

- Click the download link — the file saves to your Downloads folder.
  - Double-click the file. It opens in Preview automatically.
  - To add it to Apple Books: open Books, then drag the file into your library.
- 

## Troubleshooting

### The file won't download

- Check your internet connection and available storage space.
- The file is approximately 39MB — make sure you have enough free space.
- Try downloading on Wi-Fi rather than mobile data.

### The file opens but looks wrong

- Confirm the filename ends in .pdf.
- Try opening from your device's Files app rather than directly from a browser or email.
- On Android, make sure you are using a dedicated PDF reader app, not just a browser.
